

We have the knowledge and experience to design and build cameras and wireless systems into whatever the customer requires.

Client request: HD onboard camera system for single seater racing cars. Must include 2 cameras, one forward one rear facing, mechanical lens film motor, COFDM modulation, to be built within specific size and weight spec

Using two of the Videosys HD cameras and the Cobham SOLO4 transmitter board OEM the spec was reached and four systems were delivered to client.

Please contact us with your requirements
