Introduction

This document describes to the reader the key features and improvements, known issues and bug fixes for the Node Finder software

The document will be up issued with every software release and as such gives a traceable history in a single document.

It is possible to install the Node Finder application with a single software file which will be named with the version number, unless otherwise specified.

Software Releases

Version 1.0.2

File Names

- NodeFinder-1.0.2.exe
(Windows installer)

Compatibility

- n/a

New features

- This is the first controlled release of the Node Finder software.

Enhancements

- None.

Bug Fixes

- None.

Known Issues

- None

Related documents

- None

Version 2.0.0

File Names

- NodeFinder-2.0.0.exe
(Windows installer)

Compatibility

- n/a

New features

- Added Device Discovery Protocol support.

Enhancements

- None.

Bug Fixes

- None.

Known Issues

- None

Related documents

- None

Version 2.1.0

File Names

- NodeFinder-2.1.0.exe
(Windows installer)

Compatibility

- n/a

New features

- Added support for Linux based devices (ProRx, Eastwood, etc).

Enhancements

- None.

Bug Fixes

- None.

Known Issues

- None

Related documents

- None
